

Hanger Storage Systems

Pipp's Hanger Storage Systems are versatile and resourceful solutions for the problem of managing garment hangers. These Hanger Storage Systems are capable of being mounted on a wall, built into a cash wrap or can be incorporated into Pipp's Mobile and Stationary Storage Systems. This system's flexibility allows for all areas of the stockroom to be conveniently utilized for storage, leaving no valuable space unaccounted for. Pipp's focus continues to be developing ways to help our customers use their storage space wisely by maximizing their storage potential. The addition of our Hanger Storage Systems, to our already extensive product line of storage solutions, strengthens our capability of being your "one stop shop" for all your storage needs.

System Advantages

- ||||| Lessens the frequency of purchasing hangers
- ||||| Provides an efficient system to neatly organize hangers
- ||||| Increases productivity for processing merchandise
- ||||| Expedites circulation of merchandise
- ||||| Reduces labor expenses associated with stocking and merchandising
- ||||| Pipp's exclusive hangbar design accommodates virtually every type of hanger

Hanger Storage Solutions

Mounted Hanger Storage System

System can be mounted on wall, mobile shelving or stationary shelving. Wall Mounted System is expandable.

Mobile Hanger Transfer System

System is used to transport and recycle hangers throughout the store.

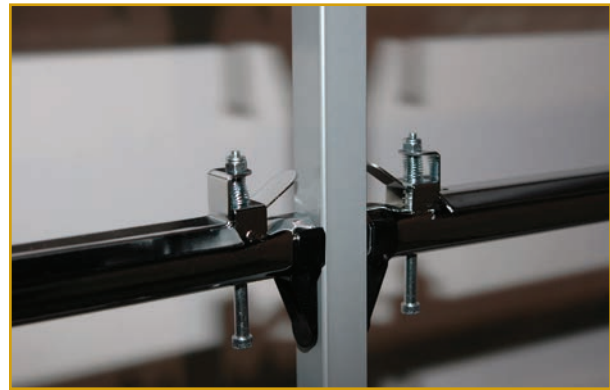

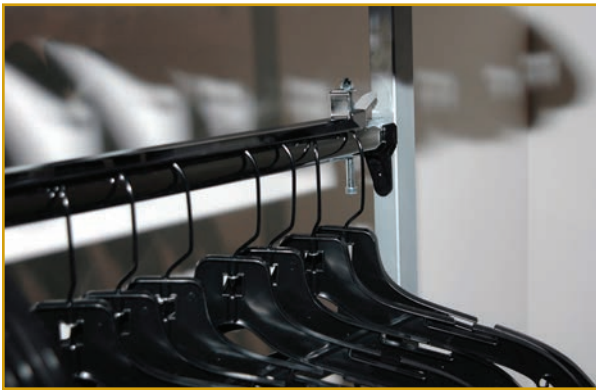

Cash Wrap Hanger Storage System

System is used to temporarily store hangers under cash wrap as purchased merchandise is removed from hanger.

Hanger Storage Systems Component Features

Hangbar is constructed of all steel and has a brilliant chrome plated finish. Pipp's exclusive, patent-pending hangbar design incorporates an infinitely adjustable locking bar which is easily engaged by compressing tabbed spring loaded pins on each end of the hangbar. When the locking bar is engaged it secures hangers into place during transport or for storage. The hangbar's design is compatible with virtually every type and style of hanger; from plastic, wood, wire and recycled to pant, shirt, child, clip and padded styles. The hangbars are secured to one of our exclusive Hanger Storage Systems by locking into octagon-shaped, plastic clips that are attached to the frame of each Hanger Storage System. The hangbars come in lengths of 21", 24" and 30". The 21" hangbar is capable of holding up to 40 hangers; the 24" hangbar can hold 45 hangers; and the 30" hanger can hold 50 hangers.
