Security Systems

Security Cages allow you to safely store and protect your inventory of high-priced merchandise. The shelving typically used for this application is our rivet style shelving which offers a variety of options for: shelving configurations - mobile or stationary; storage styles - folded, hanging or bin; and shelf decking styles - particle board, wire grid, metal or circle perforated. The sides and ends of the cage are grid panels which are bolted to the rivet shelving frame. The front panel is built with a heavy gauge galvanized steel frame and pre-hung doors.
