

Four-Post Style Shelving Solutions

Four-Post Style Shelving is the most comprehensive shelving system of its kind. It is incredibly durable, easily accessible and attractively designed. With its double wall construction and unique interlocking keyhole slot design, shelf supports are secured inside the wall leaving a smooth, clean appearance making this shelving ideal for Open Shelf Filing, Library Book Stacks, Heavy Duty Industrial Storage, X-Ray Filing, or various EDP Media Storage. Additionally, Pipp's Four-Post Style Shelving can be easily expanded as your business needs grow.

Four-Post Style Shelving Specifications

Sleek, Attractive Appearance
With no exposed holes on uprights.

Contemporary Styling
Shelf covers shelf supports for a clean, contemporary look.

Sturdy Shelves
Shelves have double-bend reinforcement on all sides. Available in 18 and 22-gauge steel.

Easy Assembly
Shelf supports snap into keyhole slot design on uprights.

Long-Lasting Finish
Baked-on enamel finish will last for years.

Numerous Shelving Options
Shelves are adjustable on 1-1/2" centers. Available with or without divider slots, in five widths and six depths.

Strong Steel Returns
Increase the rigidity of the backstop.

Added Support
Back Stop snaps into keyhole slot on uprights with shoulder rivets (rather than simple lances) for added stability.

Extra High Dividers
7-1/2" Dividers, adjustable on 2" centers, help to keep folders standing in an upright position.

Mezzanine Support
Rigid framework is designed to support mezzanine system.

Thin Profile Shelf Supports
3/4" Profile allows close shelf centers for filing, yet handles loads up to 400 lbs.

Connects to Mobile Carriages
Optional single rivet shelf supports are pre-punched to attach to mobile carriages.

Anchoring Capabilities
Return on bottom of upright allows shelving unit to be anchored securely to the floor.

Four-Post Style Shelving Assembly

Four-Post Style Shelving assembles in minutes, without fasteners!

First, place uprights opposite each other held up with a shelf support. Then, starting from the bottom, snap in two supports and reinforcements, if needed for greater load capacity. Place a shelf on the supports.

Second, working from the bottom-up, place an additional set of shelf supports in position and place shelf on supports. Repeat until all shelves, including the top, are in position. Add accessories, if applicable.

Third, add extra sections by using "T" uprights as common center posts and finish the row with "L" uprights. Install the shelf supports and shelves as previously explained.
